Green energy: STÜKEN Czech Republic invests in photovoltaic system

Rinteln/Hradec Králové, August 16th, 2024 - STÜKEN Czech Republic has had a photovoltaic system with an area of 2,550 m² and an output of 527.4 kW installed. A previously unused area of the company premises now generates approx. 25-30% of the company's energy requirements. The project, with an investment sum of around 620,000 euros, was co-financed by the EU.

Stueken s.r.o. is one of five production sites of the globally positioned STÜKEN Group. The comprehensive service package includes high-precision stamped parts, coatings, engineering and development, in-house toolmaking, automation, injection molding technology

and component assembly. The expert for stamping technology, assembly and finishing currently employs 160 people. The plant was last expanded in 2016, doubling the production area to 10,600 m².

"The aim of the EU-funded project is to reduce greenhouse gas emissions and increase the proportion of renewable energy sources. The total investment amounts to around 620,000 euros," explains Dirk Hansper, General Manager at STÜKEN Czech Republic. "We are thus making a contribution to the energy transition and at the same time making ourselves less dependent on the prices and availability of fossil fuels. A good investment in the future."

About STÜKEN

Founded in 1931, STÜKEN is today considered the world's leading supplier of precision deep-drawn metal parts. Almost 40 billion deep-drawn components are produced annually at the Rinteln plant in Germany alone. The product range also includes stamped and formed parts, plastic injection molded components and sophisticated assemblies. The products are used in a wide range of applications from the automotive industry to medical technology, from electronics to household appliances. The family-owned company has subsidiaries in the USA, the Czech Republic and China, a further plant in India is being planned. STÜKEN employs around 1,250 people and generated a turnover of 219 million euros in 2023.
